RIVETTI HAMMER

HAMMER RIVETS

Descrizione:

Progettato per un'ampia gamma di utilizzo nel settore delle costruzioni. Non richiede l'utilizzo dello strumento di rivettatura perché il mandrino in acciaio inox scivola nel corpo del rivetto in alluminio con un colpo di martello che a sua volta si apre in 3 parti che si aggrappano alla superficie esterna.

Description:

Designed for a wide range of uses in the construction sector. It does not require the use of the riveting tool because the spindle in stainless A2, slips into the rivet aluminum body with a hammer blow, which opens into 3 parts clinching to the outer surface.
